EDUCATION

Thapar Institute of Engineering & Technology

B.Tech. in Computer Science & Engineering (CGPA -8)

Patiala, IN

Aug. 2023 – June 2027

D.A.V. Public School, Sardulgarh

Senior Secondary Examination CBSE (Percentage-87%)

Sardulgarh, IN

TECHNICAL EXPERIENCE

Full Stack & DevOps Contributor (Hackathons & Workshops)

Jan. 2025 – Present

Various Platforms | India

- Worked on 2+ real-time projects in workshops using **AWS and Docker**, focusing on deployment and containerization
- Enhanced 1+ existing project by implementing CI/CD pipelines using Jenkins, along with Maven build automation and Git-based integration.
- Contributed as a Full Stack Developer in **4+ hackathons**, handling both development and deployment of applications.

PROJECTS

Clinical Trials AI Platform | React, Node.js, MongoDB, Docker, Tailwind CSS, Streamlit

[\(Link\)](#)

- Developed a full-stack system to manage 1000+ clinical trial records, ensuring transparent tracking of volunteers and preventing unauthorized testing.
- Built an AI-powered chatbot to identify eligible volunteers, reducing manual screening effort by 40% and improving selection speed.
- Designed centralized data workflows providing real-time insights for regulatory monitoring, improving compliance accuracy by 30%

VR-Based Teaching Assistant | React, AI Chatbot, VR Integration

[\(Link\)](#)

- Developed an interactive VR-based learning assistant with 10+ real-time simulations, improving student engagement and learning experience.
- Built a responsive dashboard supporting 100+ users, enabling performance tracking, analytics, and personalized feedback.
- Integrated AI chatbot handling 200+ student queries, improving response efficiency and learning outcomes.

AI Placement Portal | React, Fast API, Mongo DB, OpenAI GPT

[\(Link\)](#)

- Implemented a full-stack placement system with ATS-based evaluation, processing 200+ resumes using ML based job matching.
- Designed role-based dashboards for 100+ users, improving usability and workflow efficiency.

TECHNICAL SKILLS

Languages: C/C++, Python, Java, SQL, HTML/CSS, Java Script

Frameworks: MongoDB, Reactjs, Nodejs, Django, Redis, PostgreSQL, Expressjs, LLM, LLAMA, NLP, Flask, Spring

Developer Tools: Git/GitHub, Vs Code, Jupyter Notebook, Google Colab, Maven

Devops & Cloud: CI/CD Pipelines, Git, GitHub Actions, Docker (basic), Linux, Version Control, Deployment Automation, AWS, Jenkins

Course Work: Basic C programming, Object Oriented Programming, Operating Systems, Data structures and Algorithms, Database Management system, Test Automation.

CODING PROFILES

- **LeetCode:** Solved **200+** DSA problems
- **GeeksforGeeks:** Solved **100+** algorithmic problems
- **Codechef** Rating 1500+ [\(profile\)](#)

[\(profile\)](#)

ACHIEVEMENTS AND CERTIFICATIONS

- **HackTu – Finalist** selected among 100+ teams, developed and deployed a full-stack solution. [\(Certificate\)](#)
- **Runner-up – Israel-India Hackathon**, ranked Top 2 among 100+ teams, delivered an innovative solution within 24 hours through effective teamwork. [\(Certificate\)](#)
- **Docker Workshop**, gained hands-on experience in containerization, application deployment, image creation, and container management using Docker. [\(Certificate\)](#)
- **AWS Certification & Badges**, hands-on experience in cloud deployment and scalable application management. [\(Certificate\)](#)
- **CI/CD & DevOps Course**, gained knowledge of Agile & Scrum, build and release pipelines, and CI/CD implementation

using Jenkins. ([Certificate](#))
