EDUCATION

Thapar Institute of Engineering and Technology

B.Tech in Computer Engineering | CGPA: 8

Patiala, India

Aug. 2023 – May 2027

EXPERIENCE

Full Stack Developer & DevOps Contributor

Jan. 2025 – Present

Hackathons & Technical Workshops

India

- Engineered 2+ production-ready applications in live workshop settings using AWS, Docker, and containerization best practices, cutting manual deployment steps by 30%
- Implemented CI/CD pipelines with Jenkins and Maven for an existing production project, automating build and integration workflows via Git and cutting release time by 25%
- Led end-to-end delivery for 4+ hackathon projects, coordinating with cross-functional teammates to manage application logic and infrastructure under 24–48 hour deadlines

PROJECTS

Nexus | React, Node.js, FastAPI/Express, MongoDB/PostgreSQL, Docker, Jenkins, JWT

[GitHub](#)

- Created an ATS-friendly resume builder that scores resumes against 20+ sample job profiles, improving shortlisting chances for student users
- Developed a unified platform for recruiters and applicants to post, browse, and apply to job listings, surfacing 20+ filtered openings based on profile and eligibility
- Containerized the application into 2 services (frontend, backend) and automated build/release workflows through a Jenkins pipeline

Spendly | React, Node.js, Express, MongoDB Atlas, Docker, Jenkins, JWT, Recharts

[GitHub](#)

- Architected an expense-tracking application with category-based transaction logging across 12 categories and JWT authentication with token auto-refresh
- Analyzed 6 months of spending data to design a 3-chart dashboard (trend, category pie, daily line) with Recharts for real-time visualization
- Structured MongoDB Atlas schemas across 3 collections (users, expenses, goals) and containerized the app with a Jenkins pipeline for automated releases

Medimenter | React, FastAPI, Tailwind CSS

[GitHub](#)

- Engineered a training platform with a React frontend and FastAPI backend, collaborating with domain experts to support medical student practice and performance tracking
- Connected frontend and backend through 5+ REST API endpoints, enabling real-time data flow between modules
- Delivered a performance dashboard tracking session count, average scores, and leaderboard rank across 20+ test users to support data-driven improvements

TECHNICAL SKILLS

Languages: C/C++, Java, SQL, HTML/CSS

Frameworks: MongoDB, React.js, Node.js, PostgreSQL, Express.js, LLM, NLP

Developer Tools: Git/GitHub, VS Code, Google Colab, Maven

DevOps & Cloud: CI/CD Pipelines, Git, GitHub Actions, Docker, Linux, Version Control, Deployment Automation, AWS (basic), Jenkins

Course Work: Basic C Programming, Object Oriented Programming, Operating Systems, Data Structures and Algorithms, Database Management System, Computer Networks, Test Automation

CODING PROFILES

- LeetCode:** Solved **250+** DSA problems | [profile](#)
- CodeChef** Rating **1700+** | [profile](#)

ACHIEVEMENTS AND CERTIFICATIONS

- HackTu** — Finalist among 100+ teams; engineered and presented a full-stack solution to judges under a 24-hour deadline. ([Certificate](#))
- Israel–India Hackathon** — Runner-up, ranked Top 2 of 100+ teams; delivered a working solution within 24 hours through a collaborative team effort. ([Certificate](#))
- CI/CD & DevOps Certification** — Completed training in Agile/Scrum, build-release pipelines, and CI/CD implementation using Jenkins. ([Certificate](#))
